

Assistance Publique -Hôpitaux de Paris

University Medical Center

PUBLIC SERVICE MISSIONS

92,000 professionals dedicated to patients and their families

- 22,000 physicians
- 51,000 paramedical professionals
- The Paris area's leading employer

Providing to the best medical care to all

Every year:

- 7 million patients
- 38,000 births
- Over 200,000 surgical procedures
- 20% of patients are over 75 years old
- 30% of patients suffering from cancer in the Paris area are treated at AP-HP
- 22 free medical care centres (PASS) for the most vulnerable patients

Meeting the local population's needs

- 95% of patients come from the Paris area
- Over one million patients receive emergency room care each year
- In-home hospitalization providing for medical needs before and after hospitalization

Prevention

Specialized structures to inform and support our fellow citizens

- 8 health information units

Screening

- 38 consultation units providing free anonymous screening for HIV (Human Immunodeficiency Virus) and hepatitis.

AP-HP also provides all types of screening: for cancer (especially breast cancer), foetal abnormalities, memory disorders, genetic predispositions or diseases, etc.

Therapeutic education

Teaching patients how to better manage their treatment, how to prevent specific complications, and improve their quality of living

- Out of the 670 programmes approved in the Paris area, 300 were developed by AP-HP.

ENABLING MEDICAL STRIDES

Teaching

- 7 faculties of medicine, 2 of pharmacy and 2 of dentistry associated with AP-HP
- 27 nursing training institutes and specialized schools (paramedical healthcare managers, operating room nurses, nurse-anaesthetists, midwives, etc.)
- 3,000 interns and 13,000 students in medicine and paramedical healthcare
- 800 foreign doctors trained each year at AP-HP

Research

AP-HP actively participates in national medical and paramedical research projects.

- Over 20,000 patients included each year in the 800 AP-HP research programs
- 2,800 ongoing research projects
- Nearly 1,500 professionals specifically dedicated to research
- 40% of French hospital publications
- 3 university hospital institutes (IHU)
- 16 university hospital departments (DHU)
- A university hospital cancer hub (PHU PACRI)
- 442 international portfolios of active registered patents

Orphan drugs

The AP-HP General Agency for Health Equipment and Products (AGEPS) of AP-HP works to formulate new drugs known as “orphan” drugs, designed to manage rare pathologies not yet treated or inadequately treated by other laboratories.

reference centres

QUALITY AND SAFETY OF CARE

A process of continuous improvement in the quality and safety of care

- AP-HP subject to regular assessment by the healthcare authorities
- New campaign for V2010 certification by the French National Authority for Health
- Policy for secure drug circulation and administration

Cutting-edge equipment and technology

Patients are provided care by teaching hospital teams with the benefit of top-flight medical and technological facilities.

- 34 MRI (magnetic resonance imaging)
- 42 scanners
- 8 PET (positron emission tomography)
- 36 gamma cameras
- 3 surgical robots

Quality of service to patients

Since 2001, the AP-HP has conducted satisfaction surveys with patients in all of its short-stay hospitals (SAPHORA survey 2010).

- 77% of patients state that they are satisfied with the care received (human relations, medical information, pain management, availability of teams).

83% of cancer care services organise multidisciplinary consultative meetings

1st UMC in Europe

87% of AP-HP hospitals rated 1st in the fight against nosocomial infections

Assistance Publique-Hôpitaux de Paris (AP-HP) is the Paris area's University Medical Center (UMC) and the leading UMC in Europe. Our 92,000 professionals are proud of their public service missions and committed to providing 24-hour, high-quality medical care to all. With 37 hospitals, divided into 12 hospital groups and one federation for multiple disabilities, AP-HP works with the other regional healthcare players. Our ambition is to provide a quality medical offering in line with the needs of the local population. AP-HP also mobilizes its full expertise and innovative capabilities to the benefit of patients with complex pathologies. The combination of medical care, teaching and research allows the 7 million people treated annually to benefit from the most effective treatment available in all medical disciplines.
